

Table 3: Fama and French factor alphas of ten portfolios sorted on duration

	Low Dur	D2	D3	D4	D5	D6	D7	D8	D9	High Dur	D1-D10
$\alpha_{\text{F\&F } 3}$	0.48	0.31	0.22	0.20	0.19	0.14	0.02	0.01	-0.11	-0.49	0.98
SE	(0.10)	(0.08)	(0.06)	(0.06)	(0.06)	(0.06)	(0.07)	(0.07)	(0.10)	(0.18)	(0.15)
$\alpha_{\text{F\&F } 4}$	0.64	0.44	0.35	0.30	0.31	0.29	0.18	0.16	0.09	-0.21	0.85
SE	(0.10)	(0.07)	(0.06)	(0.05)	(0.05)	(0.05)	(0.06)	(0.06)	(0.10)	(0.18)	(0.15)
$\alpha_{\text{F\&F } 5}$	0.48	0.28	0.17	0.16	0.18	0.15	0.07	0.13	0.12	-0.14	0.62
SE	(0.10)	(0.08)	(0.07)	(0.06)	(0.06)	(0.06)	(0.07)	(0.07)	(0.09)	(0.17)	(0.13)

Notes: Sample covers July 1964 to June 2025 (732 months). Alphas and standard errors are monthly percentages. The F&F 3 model uses Mkt-RF, SMB, and HML; F&F 4 adds momentum; F&F 5 uses Mkt-RF, SMB, HML, RMW, and CMA. The local duration-decile return file starts in July 1964, so this reproduction omits July 1963-June 1964 from the paper's requested window.
